

# Emergency products that could save you

You're visiting a client. Suddenly things turn ugly and you find yourself in danger.

You can't take a phone out and call the emergency service. The office will only notice something's wrong in a few hours.

It's night and you're on the road. Your car breaks down.

You can't see the street signs and don't want to go outside the car to inform the roadside service where you are located. You have to wait for 1 hour for help from Roadside.

**You need immediate help**

**By pressing an SOS button will let people know exactly your location.**

**You need an emergency GPS Personal Tracker Phone.**
